Feature: User Account
As a user
I want to login to access the listing
So that I perform shopping process

Background:
Given I go to 'https://www.saucedemo.com/v1/index.html'
And the field 'Username' is empty
And the field 'Password' is empty

Scenario Outline: User <login> is able to login
Given I have login form
When I fill Username with <login> login and Password with <password>
And I click 'LOGIN' button
Then I should see 'Products' page

Examples:

login	password
standard_user	secret_sauce
problem_user	secret_sauce
performance_glitch_user	secret_sauce

(note: it is a good approach to keep real credentials in the *env file that is kept out of the repo. For example they can be store in the Gitlab env variables as masked and/or protected)

Scenario: Standard user is not able to login using wrong password
Given I have login form
When I fill Username with <standard_user> login and Password with <wrong>
Then I should see 'Epic sadface: Username and password do not match any user in this service' error

Scenario: User is not able to login using wrong login
Given I have login form
When I fill Username with <user> login and Password with <secret_sauce>
Then I should see 'Epic sadface: Username and password do not match any user in this service' error

Scenario: Locked user is not able to login
Given I have login form
When I fill Username with <locked_out_user> and Password with <secret_sauce>
Then I should see 'Epic sadface: Sorry, this user has been locked out.' error

Feature: Listing and product pages

        As a logged user

        I want to browse available products

        So that I can decide what to buy

Scenario: User is able to visit random product Page

        Given I have 'Products' page

        When I click on any product title or image

        Then I should see product page and price

        And url address should contain '/inventory-item.html' path

Scenario: User is able to sort products by price from low to high

        Given I have 'Products' page

        When I click sorting select

        And select 'Price (low to high)' option

        Then I should see products sorted from cheapest to most expensive

Scenario: User is able to add random product to a cart from listing

        Given I have 'Products' page

        When I click random 'Add to cart' button

        Then I should see new counter label in the cart icon

Feature: Checkout
       As a user
       I want to complete checkout process
       So that I can buy a product

Scenario: User is able to add random product to a cart from product page
       Given I have random product page
       When I click 'Add to cart' button
       And I click on the cart icon
       Then I should see random product listed

Scenario: User is able to complete checkout process
       Given I have random product in the cart
       When I click 'Checkout' button
       And I fill 'Your Information' form
       Then I see correct overview
       And I click 'Finish' button
       Then I should see 'THANK YOU FOR YOUR ORDER' header

Scenario: User is not able to modify dispatched order
       Given I have Finish order page
       When I move back using browser 'Back' button
       Then I should be redirected to the listing page
